SUMMARY

Tech Business Analyst with 6+ years of experience delivering enterprise AI enabled products across Fintech, CRM, HRM, CLM/KYC and Credit Risks. Coming from a Techno-Functional background (**Engineering + MBA**) I have helped clients in translating complex business requirements into scalable technology solutions that improve operational efficiency, user experience, and business outcomes. Over the years I have worked with enterprise and Govt clients including **Dubai RTA, National Bonds Corp UAE NABARD, HDFC Bank, Adani Group, BPCL**, and other global banking environments, leading Agile delivery, stakeholder alignment, and end-to-end product lifecycle management.

CORE SKILLS

Product Ownership | Agile Delivery | Stakeholder Management
Sprint planning | Product Roadmaps | User Story Mapping
Product Backlog grooming | Gap Analysis | Process Optimization
BRD / FRD Documentation | UAT Management | SDLC
JIRA | SQL | Power BI | Figma | Google Analytics | PLM

PROFESIONAL EXPERIENCE

Sr Business Analyst - Fintech

RapidData Technologies

Mumbai

February 2025 - Present

- Lead product ownership and delivery for enterprise platforms serving large-scale clients including RTA UAE, NBC UAE, Adani Group, BPCL, NABARD driving digital transformation initiatives across multiple sectors.
- Managed end-to-end product lifecycle for PADP, a scalable Rural Banking platform and RapidHR, an HR automation application that streamlined recruitment and workforce processes.
- Led backlog prioritization and sprint planning for 100+ user stories, improving delivery predictability and development efficiency.
- Collaborated with cross-functional teams including engineering, design, and business stakeholders to deliver high-impact product releases across multiple enterprise clients.
- Conducted gap analysis and solution design to align business requirements with system capabilities.
- Delivered POCs and Custom product demonstrations to enterprise clients, enabling solution adoption and supporting business growth initiatives.
- Developed data dashboards and operational reports, improving stakeholder visibility into product usage and performance metrics.
- Led UAT, release management, and production deployment to ensure successful product delivery and adoption.

Projects

RTA UAE – Work management portal for Road Transport Authority, UAE

WLGSP - World's Largest Grain Storage Plan — Monitoring Module

PADP - PACS Accelerator Digital Platform

NBC UAE – Nationals bonds corporation portal

RapidHR- HR automation application that streamlines recruitment and workforce processes for BPCL

Business Analyst – Credit and Retail Banking

BusinessNext

Mumbai

January 2023 – February 2025

- Drove end-to-end requirement analysis and solution design for CRMNEXT Enhancement implementations across HDFC Bank and Kotak Bank, spanning corporate banking, retail banking, and insurance lines of business.
- Led Lead Automation implementation for HDFC Bank and CRM rollout into the insurance vertical for HDFC Ergo, streamlining lead routing and digitizing policy/claims workflows across regional offices.
- Authored 10+ BRDs/FRDs and translated requirements into Agile user stories with clear acceptance criteria, maintaining a high stakeholder sign-off rate and reducing dev rework.
- Managed the full Change Request lifecycle — requirement gathering, stakeholder workshops, UAT coordination, and

production release — across a steady volume of CRs.

- Built Power BI dashboards for CR aging, lead conversion, and SLA tracking, and partnered with QA on BAAT/sanity testing, improving release visibility and quality.

Projects

RRP – End to End Credit Risk Rating platform for HDFC bank, From borrower onboarding to Borrower risk modelling
Lease Rental Discounting - Customized Credit risk rating model for Lease and Rental business Borrowers
